Potential for Radio/Television Interference(U.S.A only)

The HP DeskJet 420 printer generates and uses radio frequency energy and may cause interference to radio and television reception. Your printer complies with the specification in Subpart B of Part 15 specifications provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If the printer does cause interference to radio or television reception, which can be determined by turning the printer off and on, you can try to eliminate the interference problem by doing one or more of the following:

Re - orient the receiving antenna.

Re - orient the position of the printer with respect to the receiver.

Move the printer away from the receiver.

Plug the printer into a different outlet so that the printer and receiver are on different branch circuits.

To comply with FCC rules Part 15B Class B computing device, use only shielded interface cables.

Compliance Statement(Canada)

This Class B digital apparatus meets all requirements of the Canadian interference - Causing Equipment Regulations.

Cet appareil numerique de la class B respecte toutes les exigences du Reglement sur le materiel brouilleur du Canada.
